

Head of Bodhisattva Kannon

On display

Title/Description: Head of Bodhisattva Kannon

Materials: Bronze

Accession Number: 1193

Historic Period: Hakuho period (late 7th - early 8th century)

This bronze head has been broken away from the body. The oval face shows raised eyes with arching eyebrows and aquiline nose with small closed lips. The headdress or crown is highly detailed and elaborate, with what appears to be a bun surmounting the head. Large, long ears sit well back with extended hanging lobes. The head is green in colour, where the bronze has discoloured and some encrustation is evident on the crown area and ears.
