

Form

Ewen Henderson

Not on display

Title/Description: Form

Artist/Maker: Ewen Henderson (Artist)

Born: 1985

Measurements: h. 290mm

Accession Number: 50745

Historic Period: 20th century

Credit Line: Accepted under the Cultural Gifts Scheme by HM Government from Leslie Birks Hay

and allocated to SCVA, 2016

This handbuilt patchwork form rises from a narrow foot and expands into a terrain of textures, painterly stains and slips which run in horizontal bands. Craggy, crusted and cratered it appears as an artefact from deep time. [1] Henderson described clay as 'fluxed earth' [2] and his sculptures capture the alchemical essence of the material. Henderson's work is often compared to the natural world and there is an elemental beauty and energy to his practice. However, throughout his career Henderson fiercely rejected categorisation, he sought his work to be viewed as sculpture and for it not to be solely defined by its material.

Henderson initially trained as a painter, he studied ceramics as a mature student at Camberwell College of Art from 1965 to 1968, where his teachers included Lucie Rie and Hans Coper. His early work featured interpretations of traditional forms including tea-bowls. It was from the 1970s onwards that his work took on radical and larger sculptural forms (See 50744, 50745 and 50746). On seeing Henderson's forms for the first time in 1977, ceramicist Henry Pim compared them to, '…meteorites recently arrived from another planet where no one had heard of traditional pottery techniques'. [3] Although Henderson maintained his independence from the conventions of studio ceramics, he was not alone in defying expectations and believed the work of Gordon Baldwin and Gillian Lowndes had a strong affinity with his own. [4]
